INF3121/ INF4121

Project assignment 1 – Rules for solving and delivering it

Assignment start date: 05th of March 2016, 00:00
Assignment due date: 14th of March 2016, 23:59
Format of the delivery: PDF
Expected length of the delivery: 4-10 pages
Pass criteria: You have to score minimum 1 point to be able to attend the exam. You can score maximum 25 points.

Where is the assignment published:
The Project assignment test is published on the course webpage on the 23rd of February. You will find in the same webpage the source code to analyze and the tool to use for analysis.

How to form groups:
In Devilry, you are initially set as 1-person groups. Therefore, you have one week at your disposal before the official start date of the project to decide if you want to work alone or you want to be paired-up with someone.
To be paired-up, you need to write a short email to **Yngve Lindsjørn ynglin@ifi.uio.no**
In the email, you can say if you want to be paired-up with someone specific or with a random student.
You can form groups of maximum 3 people for the project assignment, but the project is ideal for groups of 2.

Tuition during week 7th of March:
You will have all the seminar rooms opened. Therefore, you can use the rooms to meet with other groups or just to meet with the teaching assistants. There will be two teaching assistants per seminar. All the teaching assistants will be there to answer your questions. You can attend one or more seminars.
